

# THE EVALUATION FACTS

## *Volume 1, November 2011*

Welcome to the first edition of The Evaluation Facts for the 2011-2012 season. The Evaluation Facts is a regular newsletter keeping you in touch with the latest information from Graham's Factree's Cultivar Evaluation Project.

It is that time of year again! The season has gotten away to an early start this year and as a result of the cooler temperatures experienced in October some of the first varieties to come off were a bit small and in some cases, where sugars were a little low, flavor was lacking. Similar to the start of last season heavy rain, hail and in some cases frost has been widespread again, putting pressure on growers in the early part of the season. Harvest issues are paramount but they will be closely followed by problems with disease, particularly if the current humid conditions continue.

The Evaluation Project is now into its second fruiting season and with over two hundred additional varieties being planted this past winter into the Renmark Primary Site we are well on our way to evaluating the broad pool of varieties imported by Grahams Factree. Continued support from regional growers associations and independent growers alike has resulted in Secondary Sites for stone fruit evaluations being established in Swan Hill, Perth Hills, Goulburn Valley and Bangalow, with the first trees being planted into these sites this past winter.

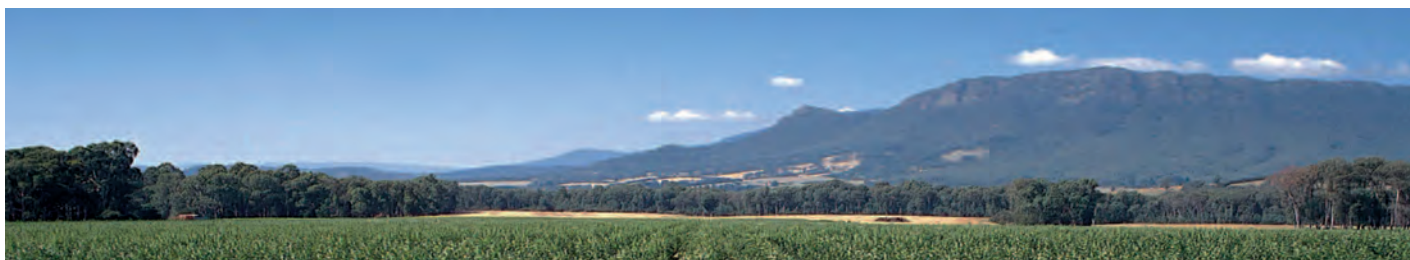

Additional plantings have also taken place at the Primary Site for cherries in North East Victoria and again with support from the industry the project has established Secondary Sites for cherry evaluation in the Adelaide Hills and the Yarra Valley in Victoria, with more sites progressively being developed in other regions.

The Annual Report outlining the findings of last season's evaluations has been published and distributed with the data from the report also being made available on the Grahams Factree website.

In this edition of 'The Evaluation Facts' several commercialised early varieties have been evaluated including 'Honey May' nectarine. This is only the second crop seen from these trees and this point needs to be taken into consideration when reviewing the data. Also evaluated amongst some of the early test cultivars are 'Snow Angel', 'Super Zee', 'Super Lady', and 'Vista Snow' peaches.

We hope you find the information in the newsletter a helpful guide and remember if you wish to discuss any aspect of the project please do not hesitate to contact our office.

Crop is ok for 1st crop.  
Not enough data or sound fruit to make a good judgement at this stage
