

Welcome to the third edition of The Evaluation Facts for the 2012 - 2013 season. The Evaluation Facts is a regular newsletter keeping you in touch with the latest information from the Graham's Factree Cultivar Evaluation Project.

It's mid to late November already and the cherries have started too. With reports of some good crop loads, everyone has their fingers crossed that the weather will be kind to growers this season. There has been some feedback that an extended flowering season this year in some districts will see growers needing to work around uneven maturity in some varieties.

The early varieties of other stonefruit are almost done with good reports being received on the first commercial crops of nectarine 'Honey May', which is great news for those growers who will see fruit from their trees next season.

There has been some exceptional 'Polar Light' and 'Zee Fire' fruit coming from some districts which is fantastic for those growers and from all accounts prices have been quite reasonable for the start of the season, lets hope it continues.

At the start of November the The Evaluation Project held a field and training day for the project collaborators. The key intention of the day was to provide those growers who are managing stonefruit evaluation sites on behalf of the Project with an understanding of the current evaluation process that is utilised within the Project. The Project Management Team recognises that the results of this project very much hinge on the consistency of the evaluation reporting and therefore the field day was designed with that principal in mind. Growers from Western Australia, Goulburn Valley and Swan Hill all took time out from the hectic start to the season to attend the Primary Site in Renmark. Overall, it was a very successful day and Graham's Factree would like to take this opportunity to thank the growers involved for allocating the time and effort to help the Project achieve its objectives.

Above and below: Growers participating in the field and training day held in early November.

This project is funded by HAL through voluntary contributions from Graham's Factree Pty Ltd with matched funds from the Australian Government.

Comments & Commercial Comparator

Nice flavor, but need to see it settle down more. Generally too small with uneven ripening
