

'The Facts'

Keeping you in touch with information from
Graham's Factree
Vol 4 December 2010

Welcome to the next edition of The Evaluation Facts, a regular newsletter keeping you in touch with the latest cultivar evaluation information, from the cultivar evaluation program being coordinated by Graham's Factree.

In order to assist growers to make direct comparisons between the maturity timing of a commercially planted variety against a test variety from the newsletter, we will be endeavouring to include a brief note of what commercial varieties are currently being picked out of the evaluation region.

Obviously exact picking dates can vary from grower to grower and within one region, however we hope this information can act as a guide and be beneficial to those reading the newsletter.

Currently in Renmark, 'Honey Fire' (D), 'June Candy' and Diamond Bright nectarines are all being picked. 'Kay Pearl' nectarine is expected to be started late this week.

We would encourage anyone interested in participating in the evaluation program to contact their local association to register their interest. Please do not hesitate to contact the staff at Graham's Factree to discuss any of the cultivars currently available, or undergoing testing.

This project is funded by HAL through voluntary contributions from Graham's Factree Pty Ltd with matched funds from the Australian Government.

Comments & Commercial Comparator	stones split when fruit is cut		Overall Score /10 8

Factree Editorial Notes:

In discussion with evaluators it has been determined that some early or low chill varieties can have a 'soft stone' that can be physically split when fruit is cut in half. These soft stones do not appear to be detrimental to the commercial viability of the cultivar. Soft stones are not regarded in the same context as split stones.

Comments & Commercial Comparator	over cropped on Giesla 6. Will be better size on another rootstock or one better managed		Overall Score /10
			7

Factree Editorial Notes:

'GiSela 6' rootstock is a dwarfing rootstock used in high density cherry plantings. It is a characteristic of Giesla 6 to cause trees to be highly precocious. Particular growing techniques are required for appropriate management of this rootstock.

Comments & Commercial Comparator

Generally average crops, usually doubles and triples, generally gaping holes. Good flavor
